**we get you**

## **Now we can help you get health insurance.**

Callen-Lorde's Facilitated Enrollment program is available to help determine if you're eligible for free public health insurance and, if so, help you enroll. During your session (which takes about 30 minutes), the enroller will talk to you about your residency and financial situation to help determine your eligibility for public health insurance.

If you qualify, your enroller will assist you with the application and help you get the necessary supporting documents. We'll submit the application on your behalf and provide any follow-up you may need. It's that easy.

The service is free and you do not have to be a patient of Callen-Lorde to receive enrollment services. Facilitated Enrollers are available at Callen-Lorde during all clinic hours and offsite at locations throughout NYC.
